

What is Business Enterprise Architecture?

It's a structure that ensures investment decisions and project efforts are aligned with:

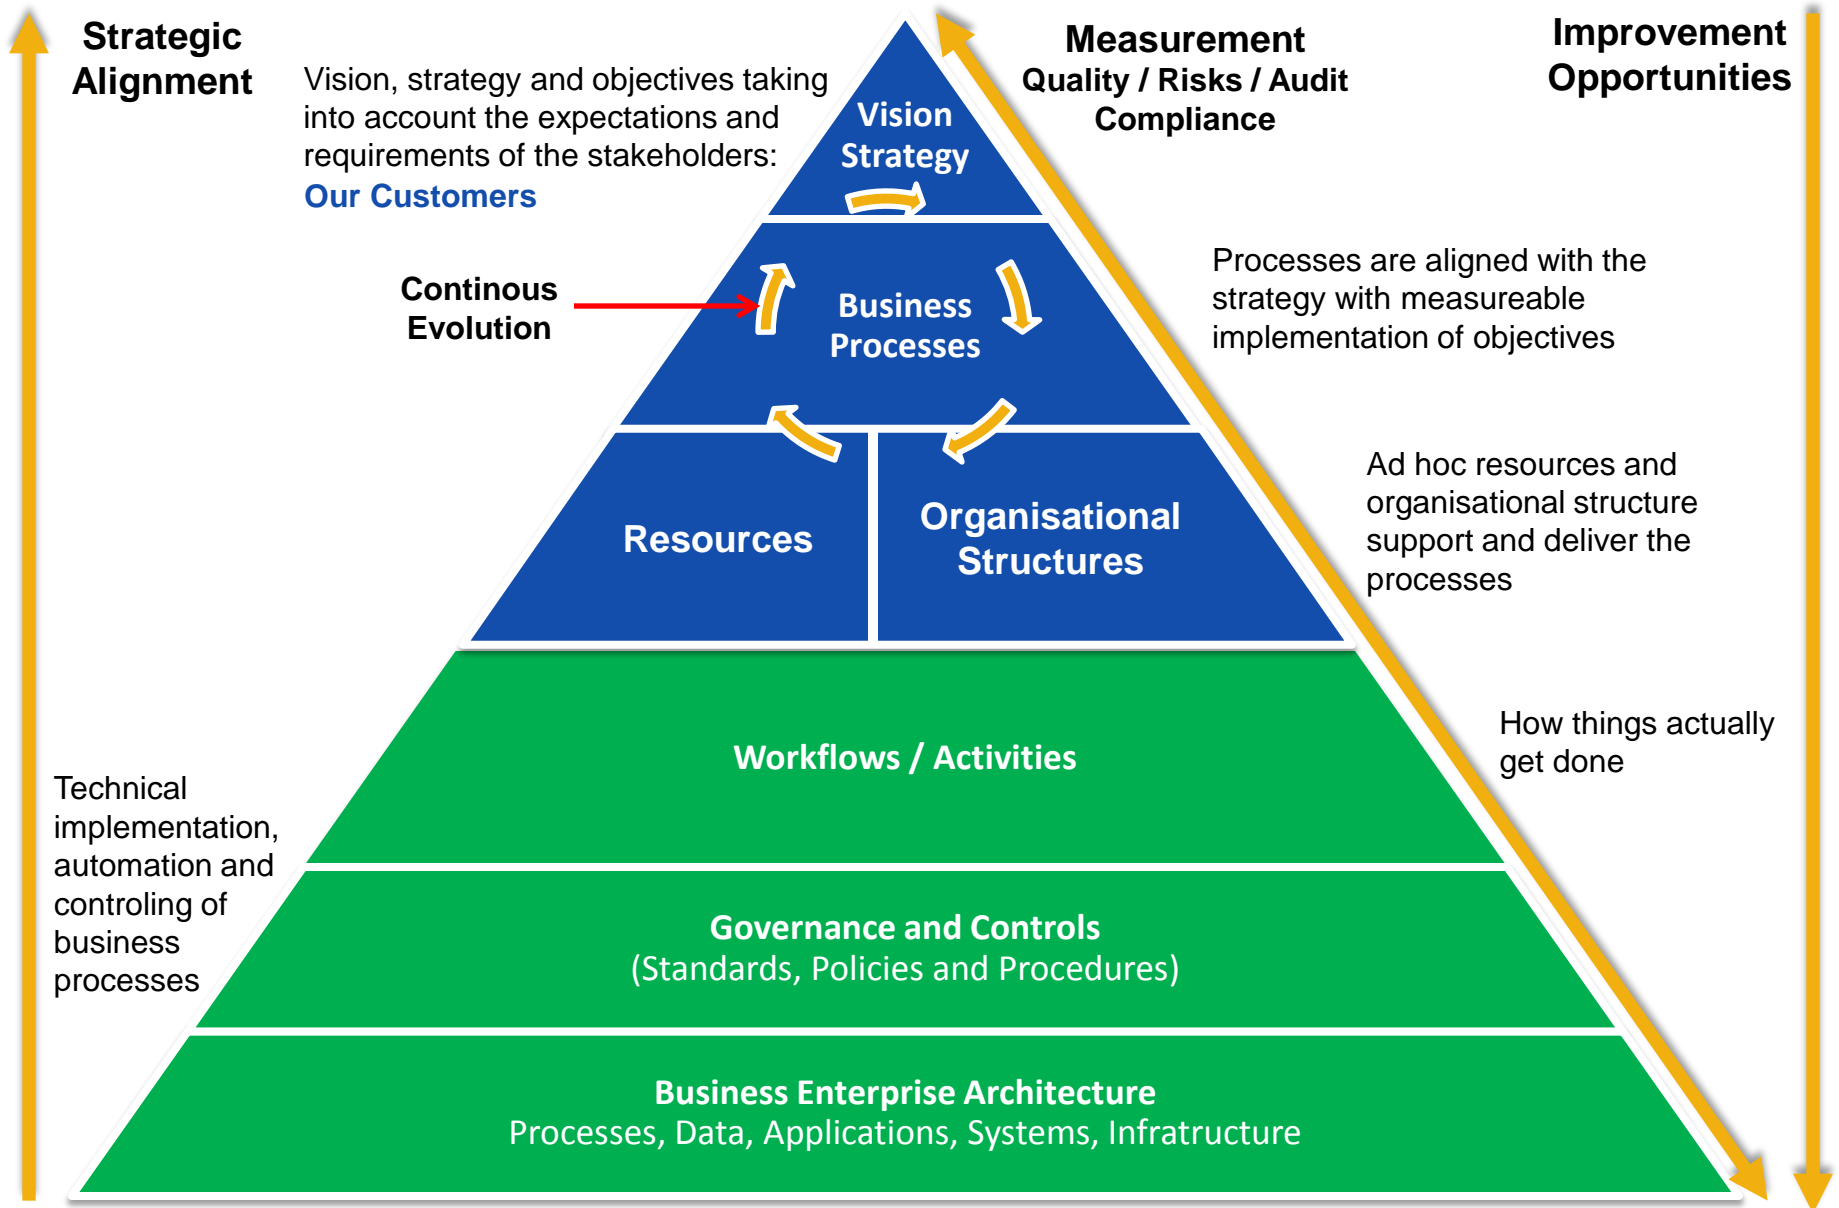

- ✓ Strategic Goals and Objectives
- ✓ Organisational Standards
- ✓ Core Principles
- ✓ Mission Performance
- ✓ and have the ability to execute

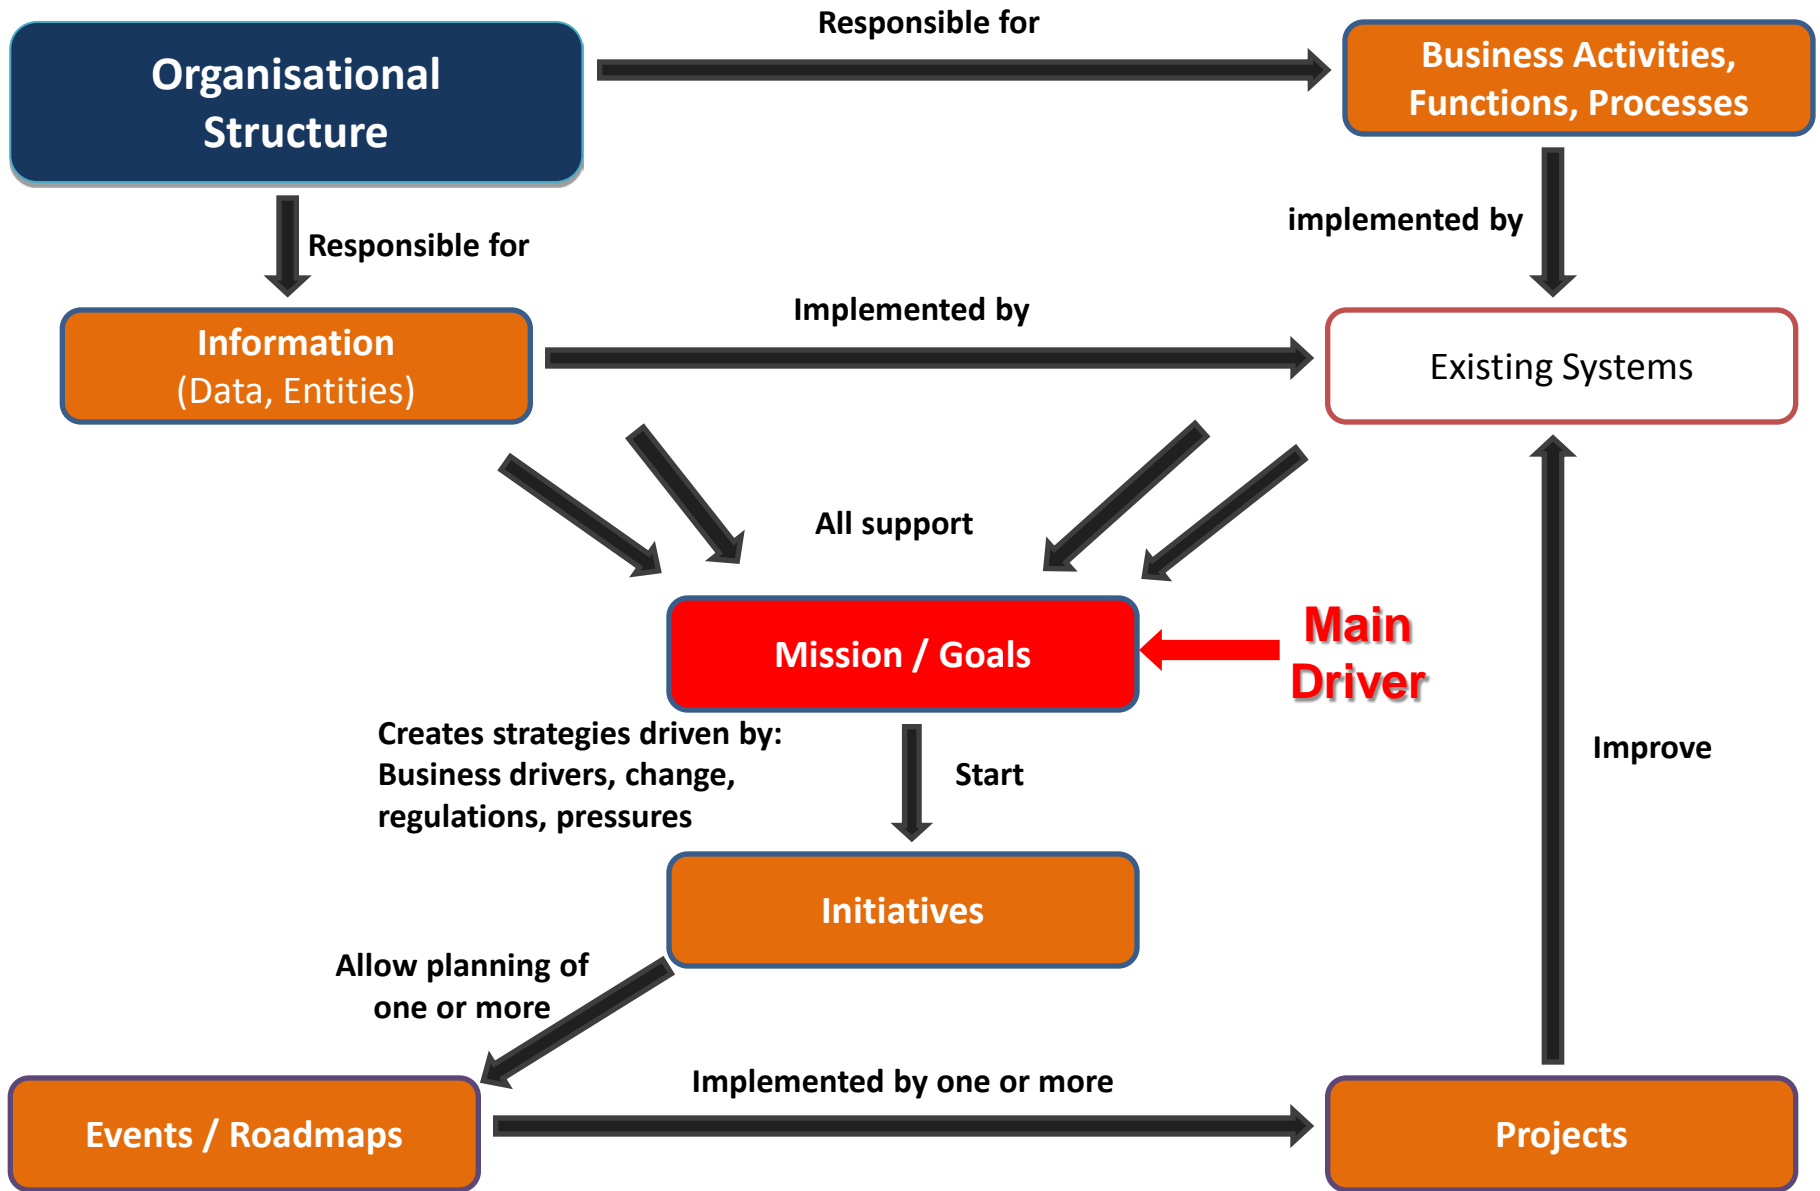

A Modern Process-Driven Organisation

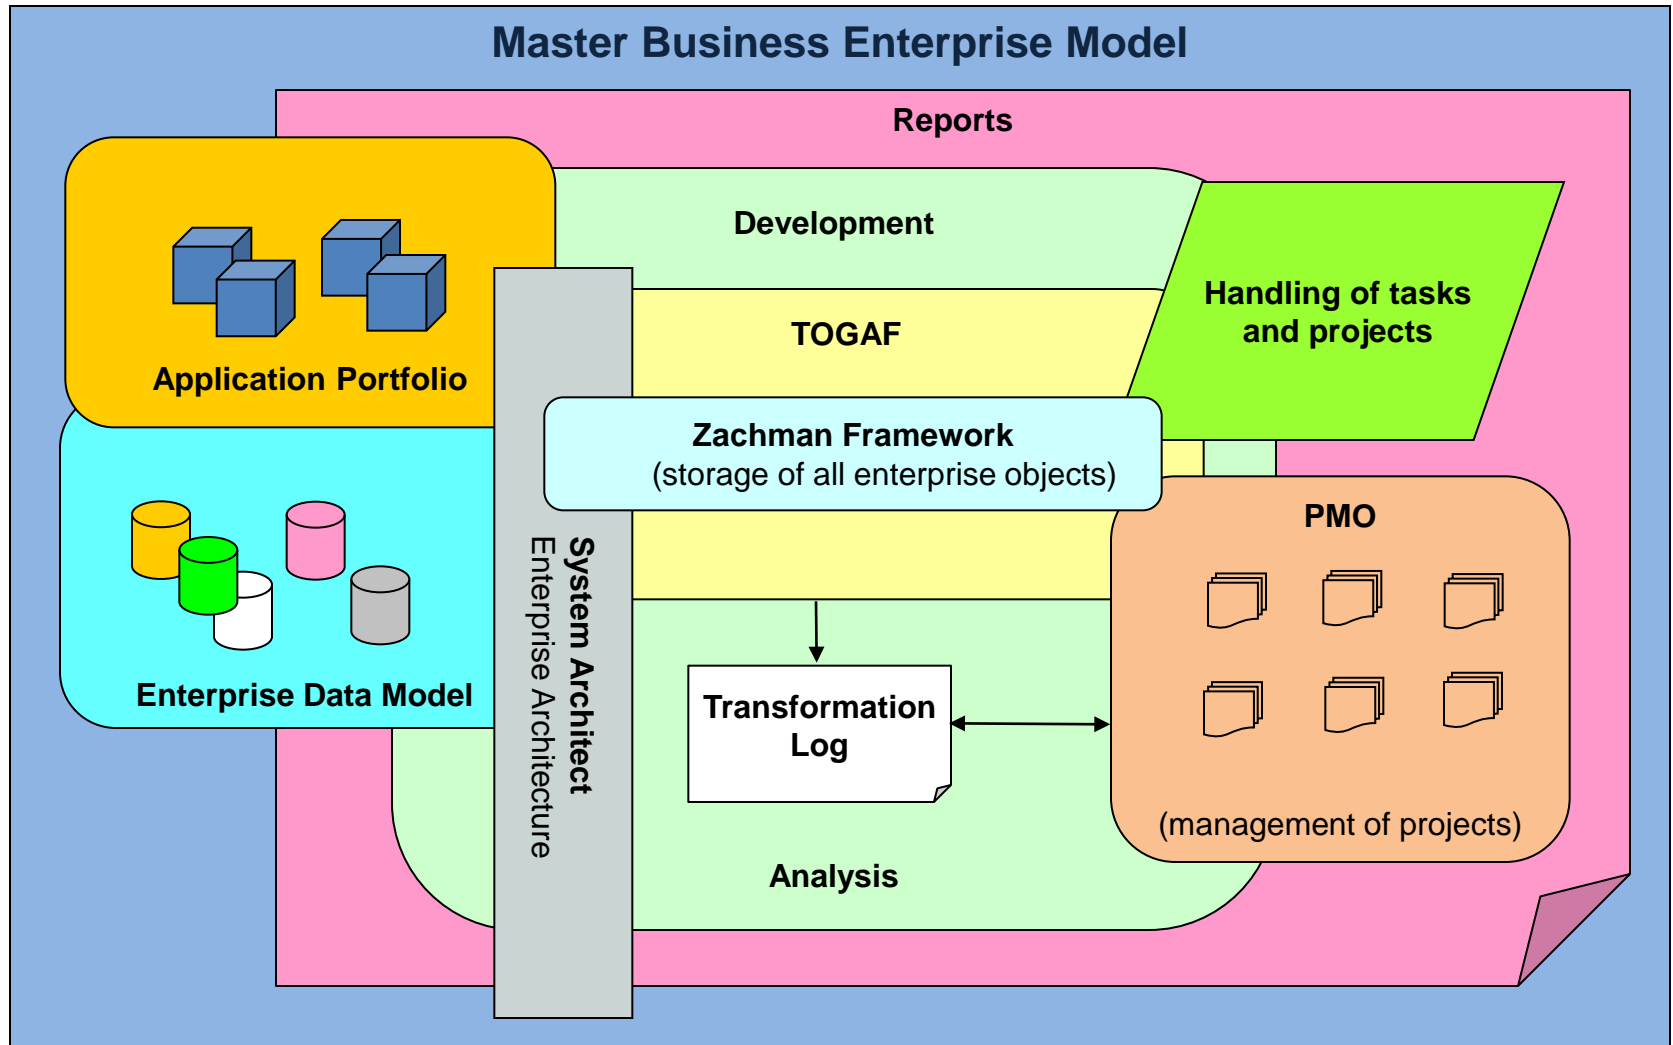

Principles:

- ✓ **Success** of the organisation is built on the **satisfaction** of your customers, internal and external
- ✓ **Improvement** is built on your **key processes**
- ✓ Work is done **incrementally**
- ✓ Satisfaction is measured through the **overall improvement** of all your services, not only isolated points
- ✓ Model is of the **whole organisation** and not only of departments or functions separately

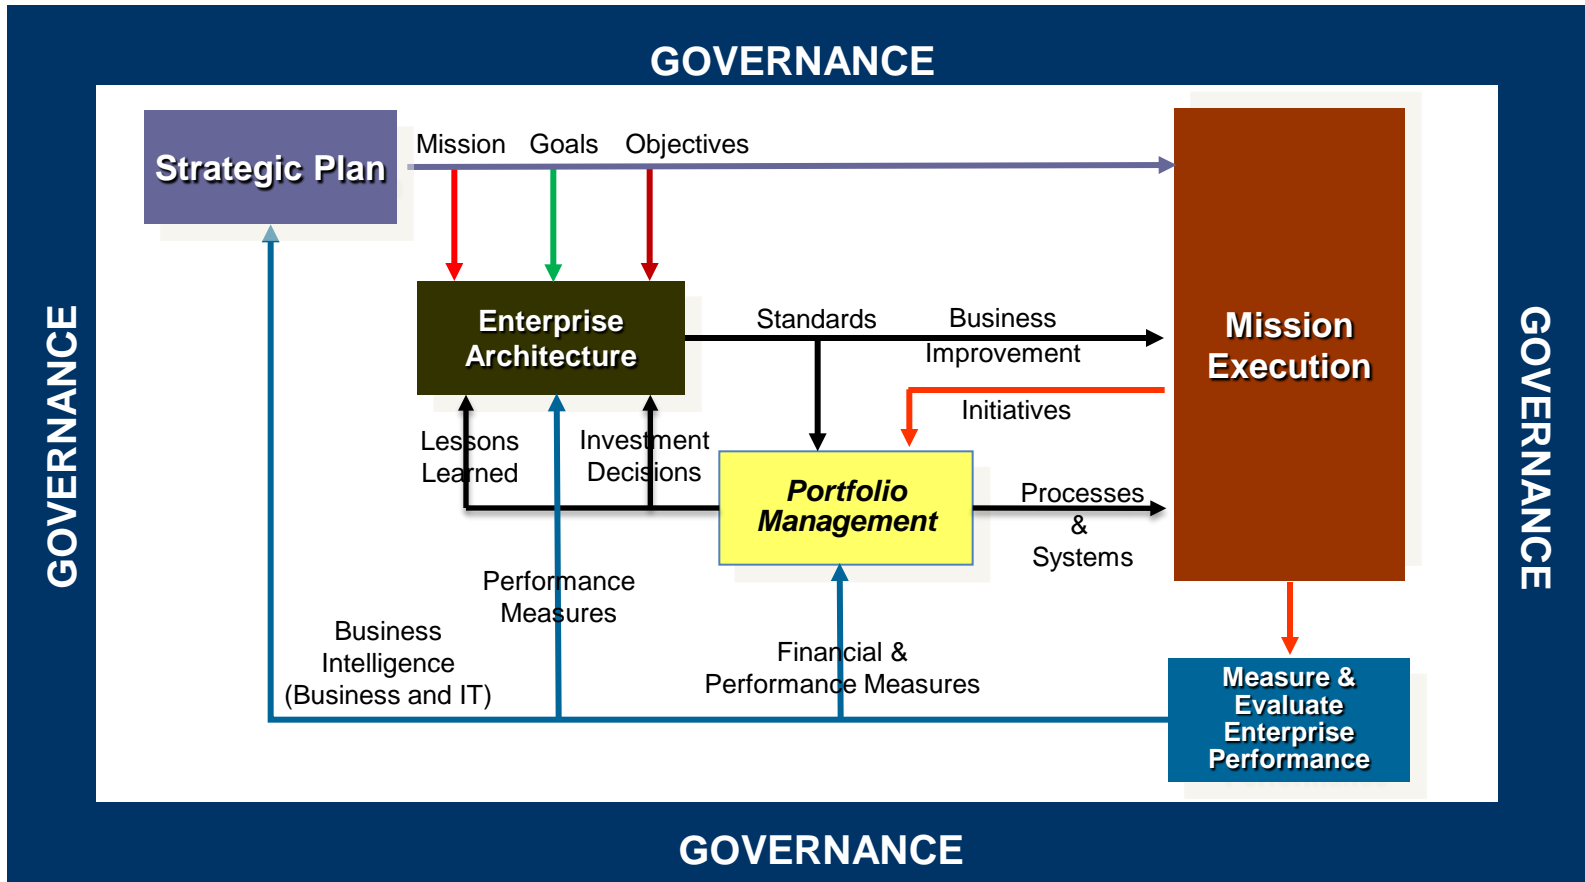

What is Business Enterprise Architecture?

Business Enterprise Architecture provides an organisation a structure to ensure that investment decisions and project efforts are in line with Strategic Goals and Objectives, Organisational Standards, Core Principles and Mission Performance; and the ability to execute.

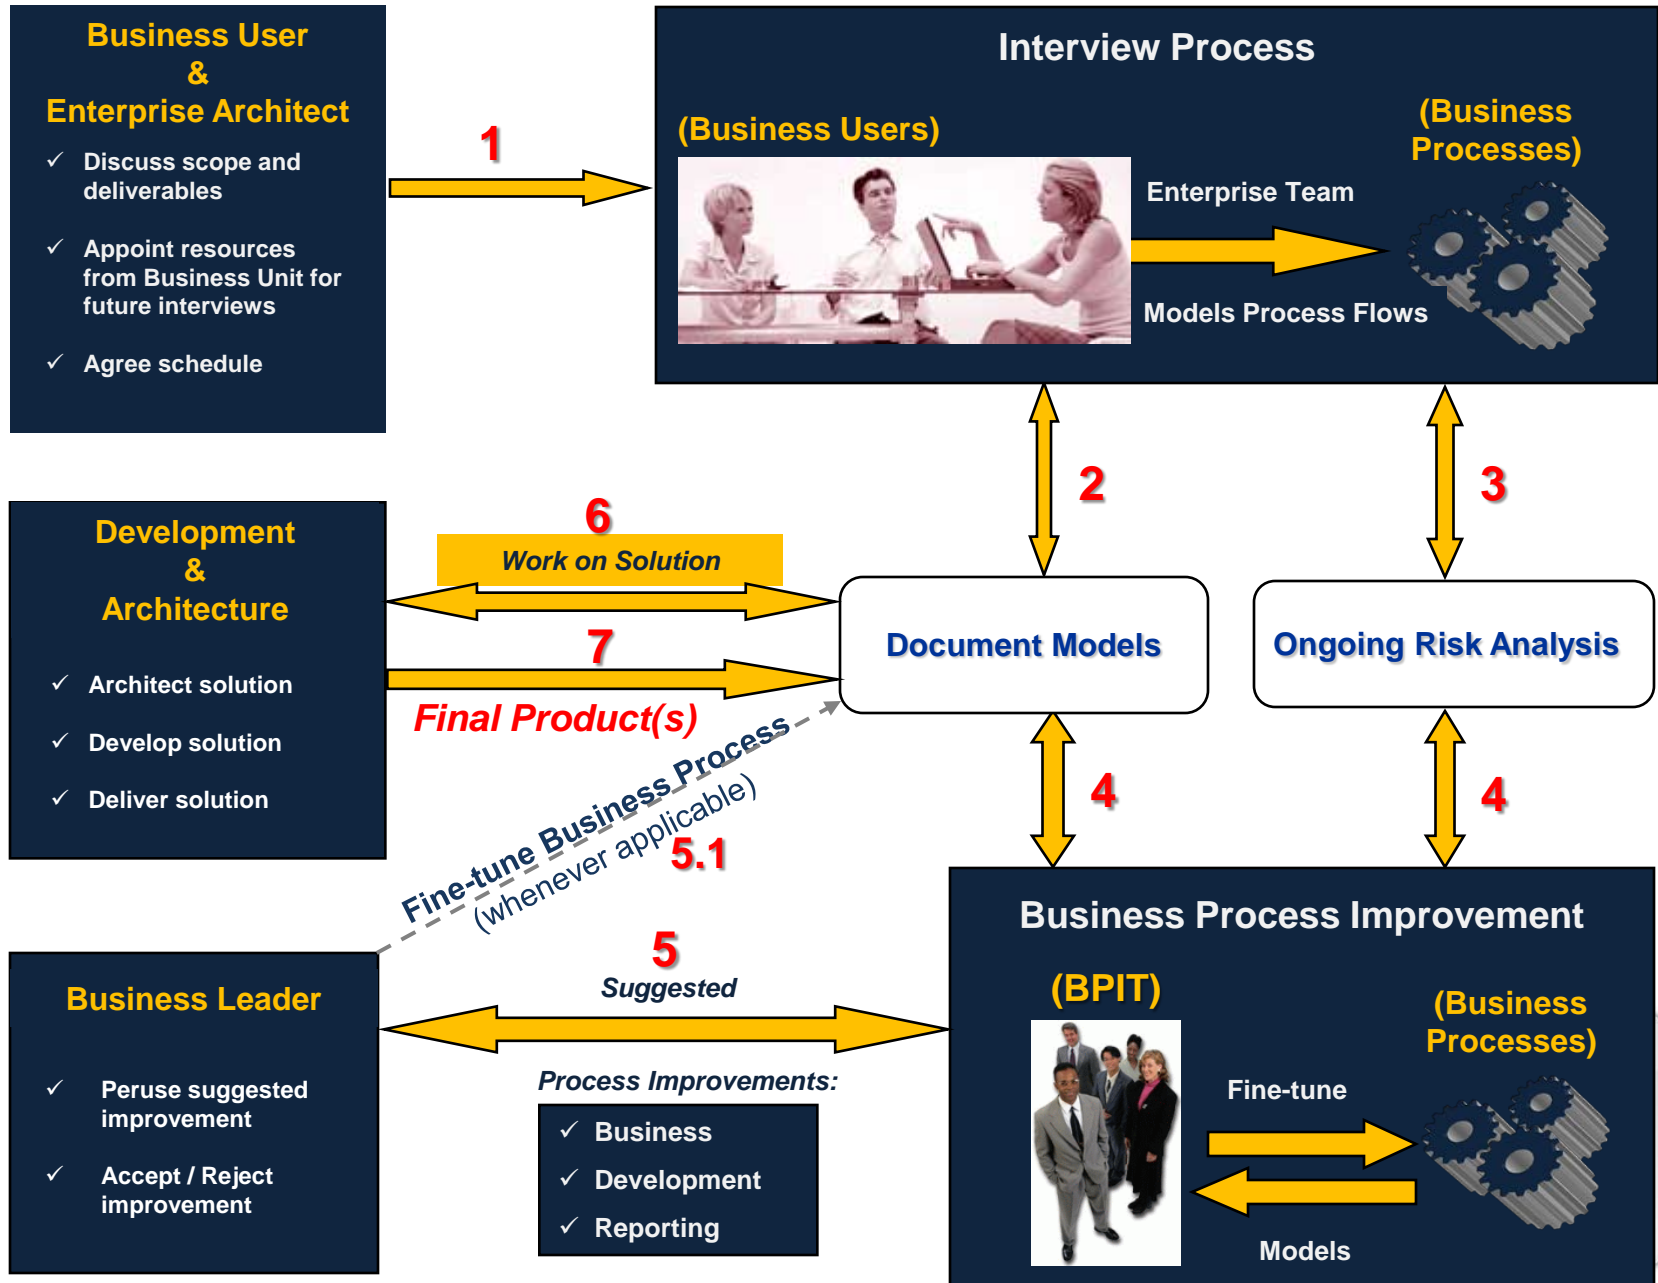

What can Enterprise Architecture help you achieve?

- ✓ **Higher quality service** to your Customers
- ✓ To have the power to **explore different aspects** and **points of view** when developing corporate strategies, business processes and information support
- ✓ Understand and **improve your Business** by combining established models and methods
- ✓ Enterprise Data that focus on well **understood needs** and **measured risks**
- ✓ Ability to do Business Process Improvement (**BPI**)
- ✓ **Risk Analysis, Identification and Resolution**
- ✓ **Institutionalise Knowledge**
